

# Predicting home sale prices in Ames

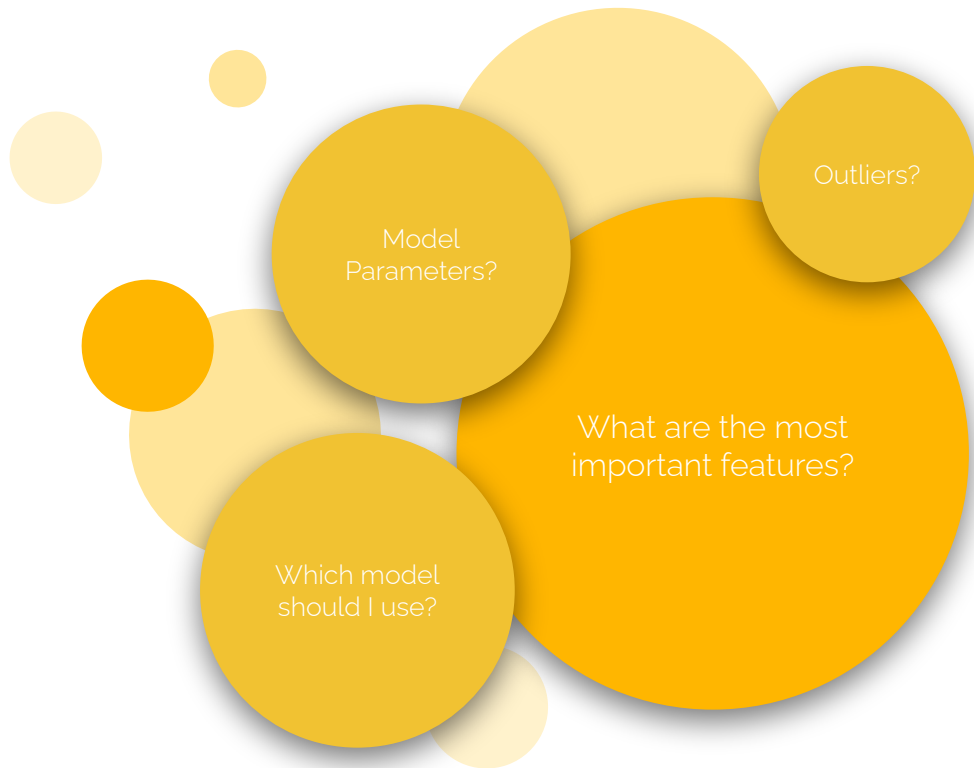

# Hello!

I am Alex Fioto

I am here to talk about predicting home sale prices based on data from Ames, Iowa.

# What are the best **predictors** of house sale price?

# Check the data.

What is in there?

# Data Cleaning

- Data types: Numerical, Ordinal, Categorical
- Imputing missing data: KNN
- Removing Outliers

**What seem like  
promising features?**

# 80 Features!

How many? Too many.  
Maybe...

# Selected Features

- Square Footage
- Overall Quality
- Neighborhood
- Garage
- Basement (quality and size)
- Bathrooms
- Heating and Air
- Year Built/Remodeling
- Lot Size

*Location, location, location!*

*- Harold Samuel*

## Neighborhoods

Inspiration from Alvin T. Tan on [medium](#)

# Neighborhoods

3

**What is the best model?**

# Linear Models

- Linear Regression
- Ridge
- Lasso
- Elastic Net

# Ridge

# Pipeline and Hyperparameters

- KNN Imputer (k=5)
- Standard Scaler
- Polynomial Features
- Select K Best (147 out of 150)
- Ridge (Alpha = 175)
- $R^2 = 0.9381$
- RMSE = 18892.8

# Features that Matter

# Conclusion

- Quality
- Square Footage
- Neighborhood

# Thanks!

Any questions?
